Register to hear from airport CEOs and aviation sustainability leaders as they present national and international airport case studies, airline sustainability programs, emerging technologies, renewable energy and alternative fuels, waste and recycling initiatives, as well as media perspectives on sustainability in the industry.

The Sustainable Airport Manual (SAM) version 2.0 will be unveiled and distributed on November 15 - including three new chapters on Planning, Operations/Maintenance, and Concessions/Tenants.

Tour O'Hare Airfield and see first hand, the O'Hare Modernization Program construction sites and integrated sustainability programs.

To view the entire conference agenda or for more information please visit www.airportsgoinggreen.org

Program information, exhibit and sponsorship opportunities are still available please contact:

Leslie Riegle, AAAE, at (703) 824-0504, Ext. 203 or leslie.riegle@aaae.org

Don't forget, The Greenbuild International Conference and Expo is also in Chicago November 17-19!

Airports Going Green attendees will have free access to the GreenBuild exhibitor hall where thousands of sustainable products and services will be featured. More information on the Greenbuild International Conference and Expo can be found at: <http://www.greenbuildexpo.org/Home.aspx>

~ ~ ~

The Chicago Department of Aviation (CDA) is self-supporting, using no local or state tax dollars for operations or capital improvements at O'Hare and Midway International airports. Together, Chicago's

airports generate more than \$45 billion in annual economic activity and create 540,000 jobs for the region. Please visit www.flychicago.com to learn more about the Chicago Department of Aviation.

The CDA continues to incorporate and expand sustainable initiatives for airport planning, operations and maintenance, concessions and tenants in accordance with the CDA Sustainable Airport Manual (SAM), released in August 2009. To view case studies, lessons learned and new technologies, and for more information on the SAM, please visit www.airportsgoinggreen.org.

The O'Hare Modernization Program (OMP), introduced by Mayor Richard M. Daley in June 2001, transforms O'Hare's airfield from an outdated system of intersecting runways into a modern parallel runway configuration. The program will reduce overall delays at the Airport by 79 percent, and bad weather delays by 95 percent. It will create 195,000 new jobs and \$18 billion in additional economic activity each year. Please visit www.oharemodernization.org to learn more about the OMP.
